16 GLEN MATTSON: I'm Glen Mattson. And I lived in
17 Idaho Falls, where that D.O.E. is. And I lived there
18 for, oh -- After I come back from Seattle, I lived there
19 for 30 years, from probably '47 until about a year ago;
20 I moved over here.

21 And one of the reasons I moved over here is to
22 get away from that D.O.E, that uranium, and all that
23 stuff. They're storing that stuff out there. And I've
24 talked to a lot of people that work out there, and they
25 say that their stuff is -- they got it in barrels, and

0009

1 it's rusting out. And, oh, that stuff could leak out
2 and get down in the aquifer of the water.

3 And that's it. That's the reason I'm against
4 it.
